

Fabspeed Motorsports installed a Kleemann Kompressor system along with headers and downpipes on this 2003 Mercedes Benz SL 500R. Stock power is at a minimal 231 HP and 261 ft/lbs. of torque. The roots type Kompressor system supplied by Kleemann features an integrated air-to-water intercooler, the only known system to combine the intake manifold, Kompressor and intercooler into one integral unit. As a result, power increased to 336 rwhp and 351 rwtq.
